OBJECTIVE

Full Stack Developer primarily focused on Flutter, with experience building scalable mobile and web applications using Flutter, React.js, and React Native. Familiar with backend development using Node.js, API integration, and database design. Proven ability to deliver production-ready applications and integrate third-party services in fast-paced startup environments.

EXPERIENCE

Full Stack Developer (Remote) – *Muncho Technologies*, Bangalore Nov 2025 – Present

- Led development of a Flutter waiter management app, enhancing usability and streamlining order workflows
- Implemented GetX state management, improving maintainability and reducing UI inconsistencies
- Built React.js dashboard modules, creating custom QR code designer and applying UI improvements
- Contributed to React Native (Web) app, developing responsive UI and integrating Reelo services
- Designed and integrated REST APIs, enabling seamless frontend–backend communication
- Developed Node.js & Express backend services with third-party integrations
- Managed and optimized data flow using MySQL and Firebase
- Collaborated in a startup environment, driving feature releases and product improvements

Flutter Developer Intern (Remote) – *Muncho Technologies, Bangalore* Mar 2025 – Oct 2025

- Built waiter management app UI from scratch under senior guidance
- Developed and integrated backend APIs for dynamic features
- Implemented GetX state management, improving app structure and performance
- Managed real-time data with Firebase and built reusable components
- Gained hands-on experience across full-stack mobile application development lifecycle

PROJECTS

Chat Application (Flutter + Firebase)

- Built a real-time chat app with modern UI and smooth user experience.
- Implemented authentication, notifications, and media sharing.
  https://github.com/snehakumari1112/Chat-App

Travel Website

- Designed a responsive travel website with a mobile-first approach
- Improved UI consistency and performance
  https://viewtemples.com/

TECHNICAL SKILLS

Full Stack Development (JavaScript): React.js, Node.js, Express.js, REST API Development
Mobile Development: Flutter (with GetX state management), React Native
Databases: MySQL, Firebase
Tools & Platforms: Git, GitHub, Postman, Figma, Webflow, VS Code
Integrations & API Management: Shiprocket, Reelo, Razorpay (familiar), APISIX (key management and API gateway)

EDUCATION

AMC Engineering College, Bangalore 2020 – 2024

Bachelor of Engineering – Information Science
CGPA- 8.92
