OBJECTIVE

Frontend Developer with freelance experience, proficient in modern technologies and frameworks, seeking full-time roles in dynamic and innovative projects focused on user experience.

EDUCATION

Bachelor of Information Science, AMC Engineering College (Bangalore)   2020 - 2024
CGPA- 8.92

SKILLS

Technical Skills	C, HTML, CSS, JavaScript, Dart, Firebase, MySQL
Frameworks & Libraries	ReactJS, Flutter, Tailwind CSS, Bootstrap
Tools	Figma, Webflow, VS Code, Git/GitHub
Soft Skills	Problem-Solving, Adaptability, Communication, Time Management

EXPERIENCE

Freelance Frontend Developer (Remote)   Aug 2024 – Present
- Increased client satisfaction by delivering tailored web solutions using HTML, CSS, JavaScript, and React, ensuring on-time project completion and high-quality results.
- Adapted to dynamic project requirements, enhancing user experiences and securing long-term client partnerships.
- Strengthened client relationships through regular updates and clear communication, fostering repeat business and positive referrals.

PROJECTS

Chat App | *Flutter, Firebase (Authentication, Real-time Database, Cloud Storage), FCM*: Developed a chat application using Flutter with a user-friendly interface and payment integration. Integrated Firebase for user authentication, real-time database for messaging, and cloud storage for media handling. Implemented Firebase Cloud Messaging (FCM) for real-time push notifications, ensuring instant message delivery and updates. Focused on delivering a smooth and secure user experience across devices.

To-Do Application | *ReactJS, Redux, Local Storage*: Engineered a simple yet effective To-Do application using ReactJS and Redux, enabling users to add, edit, and delete tasks efficiently. Integrated local storage to ensure task persistence across sessions, ensuring seamless usability. Prioritized intuitive user experience with optimized performance and state management.

Travel Agency Website | *HTML, CSS, JavaScript, React, Bootstrap*: Designed and implemented a travel agency website with engaging visuals and intuitive navigation using React and Bootstrap, enhancing user experience and streamlining travel planning. Focused on responsive design and optimized performance to ensure a seamless experience across devices.

Breast Tumor Prediction Using Machine Learning | *Logistic Regression, Decision Tree, Random Forest*: Created a web application for breast tumor prediction using machine learning models. The system analyzes and classifies medical data with high accuracy, aiding in early detection and treatment decisions through a user-friendly web interface.

EXTRA-CURRICULAR ACTIVITIES

- Led as Head Girl at Higher School, showcasing strong leadership, responsibility, and a commitment to creating a positive school environment.
- Engage in freelance front-end development, focusing on crafting and executing websites with contemporary technologies and frameworks. Proficient in overseeing projects autonomously and partnering with clients to realize their visions.
- Directed and coordinated our college project team, exhibiting effective leadership and a dedicated, collaborative approach.
